Math:

- Notebook and Folder OR Paper and Binder with Pockets for Handouts
- A Six-Inch Ruler
- Calculator -
 - Geometry - A scientific calculator such as the Texas Instruments TI-30XIIS; a calculator that worked for Algebra I is also ok. The calculator should be capable of trigonometry functions such as sine (SIN), cosine (COS), and tangent (TAN). If you will purchase a new calculator, consider a graphing calculator such as the TI-84 Plus CE. This calculator will be needed for follow-on math courses such as Algebra II and Pre-Calculus.

High School (9th - 12th) - continued

- Algebra II - A graphing calculator such as the TI-83 or 84 Graphing Calculator (or AP Approved Graphing Calculator)
 - The TI-84 Plus CE with the color display is the best choice but there are others that do well, such as Casio fx-9750GIII Calculator, the NumWorks Graphing Calculator, and the TI-84 Plus.
 - For Algebra II, the TI-84 Plus CE is the calculator that will be used for in-class instruction. Choosing a different type of graphing calculator is ok, but the student may need to do some extra work to determine how to use their calculator to conduct the operations we are doing in class.

- Graph Paper

Financial Literacy:

- Notebook and Folder

Leadership:

- 1" binder
- Subject Divider Tabs (optional)

Dream Big II:
